

CLAIMS LISTING

1. (currently (twice) amended) A nutritional supplement protocol in which effective amounts of ethylenediamine tetraacetic acid are administered both in a mouth rinse and as an oral pharmaceutical, wherein the mouth rinse is administered to a patient daily and the oral pharmaceutical is administered on at least ~~every~~ five out of every seven days, and further wherein the ethylenediamine tetraacetic acid administered orally is enteric coated.
2. (original) The nutritional supplement protocol according to claim 1, wherein the enteric coated ethylenediamine tetraacetic acid is administered, on the days that it is administered, in an amount between 200-900 mg.
3. (original) The nutritional supplement protocol according to claim 1, wherein the mouth rinse containing ethylenediamine tetraacetic acid also contains Vitamin C.
4. (original) The nutritional supplement protocol according to claim 1, wherein the mouth rinse containing ethylenediamine tetraacetic acid also contains Vitamin C and Lysozyme.
5. (previously amended) The nutritional supplement protocol according to claim 1, further comprising a dose of phosphatidyl lipids additionally administered to the patient on a daily basis.
6. (previously amended) The nutritional supplement protocol according to claim 5, wherein said dose of phosphatidyl lipids is in the daily range of about 100-3500 mg for an adult patient.
7. (previously amended) The nutritional supplement protocol according to claim 6, wherein said dose of phosphatidyl lipids is in the daily range of about 1400 mg.
8. (previously amended) The nutritional supplement protocol according to claim 7, wherein said dose of phosphatidyl lipids is accompanied by a 3-300 mg dose of alpha lipoic acid.

9. (previously amended) The nutritional supplement protocol according to claim 8, further comprising a daily dose of a combination of Reishi and Shiitake mushrooms administered to the patient.
10. (withdrawn) A kit for nutritional supplementation containing any or all of: a) a soluble ethylenediamine tetraacetic acid pharmaceutical dosage form suitable for solution or suspension in a mouth rinse; b) at least one oral, enteric-coated pharmaceutical dosage form containing ethylenediamine tetraacetic acid; at least one oral dosage form containing phosphatidyl lipids; and at least one oral dosage form containing a combination of Reishi and Shiitake mushrooms in approximately equal proportions.
11. (previously amended) The nutritional supplement protocol according to claim 1, wherein the enteric coated ethylenediamine tetraacetic acid also contains Vitamin C.
12. (previously amended). The nutritional supplement protocol according to claim 1, wherein the enteric coated ethylenediamine tetraacetic acid also contains dimercaptosuccinic acid.
13. (previously amended) The nutritional supplement protocol according to claim 11, wherein the enteric coated ethylenediamine tetraacetic acid with Vitamin C also contains dimercaptosuccinic acid.
14. (new) A nutritional supplement protocol administered to a patient on a daily basis in which effective amounts of ethylenediamine tetraacetic acid are administered both in a mouth rinse and as an oral pharmaceutical, wherein the mouth rinse also contains Vitamin C and Lysozyme, wherein the oral pharmaceutical also contains Vitamin C and dimercaptosuccinic acid and is enteric coated, and further comprising a daily dose of phosphatidyl lipids accompanied by alpha lipoic acid and a daily dose of a combination of Reishi and Shiitake mushrooms.
